

## CSC 131: Introduction to Computing

This course introduces the student to the field of information technology. The course provides an overview of the computer science and computer information systems majors and makes students aware of the attitude, skill, and capabilities necessary to succeed in an information technology field. Topics include data representation, data organization, interpreting algorithms, interacting with operating systems, and problem solving strategy.

Credits: 3

Co-Requisites: MAT 132 or MAT 134, or an acceptable score on a mathematics placement test.

Program: **Computer Science**
